- **Accepting all the international students** (all countries & nationalities) providing all the support & necessary documents needed for the European Student visa process.

Gulf Air
ACADEMY

Course Description:

Modular ATPL, also referred to as the 0 to ATPL course, grants its holder the highest level of pilot certification. By following a structured single course divided into carefully planned training modules, it's designed to take you from no previous experience in aviation all the way to the ATPL licence.

The training in this program will allow you to acquire an ATPL through what is commonly called the Modular Pathway. This means that your training progresses through a series of modules. Each module will be a step forward towards your training, but you don't need to commit to all the modules at once. You have more control over the timeline of your training. Applicants for this course have a choice between Residential and Distance Learning Theoretical Training courses. The advantage of the modular pathway is that it can be completed at your own pace.

Gulf Air Academy Modular ATPL Course is (EASA) approved & designed to give you the exact knowledge and expertise to meet the requirements of all the major airlines around the world, once you finish this course, you will be ready to take a right seat in all the major airlines!
