Your entry point to aviation:

The Private Pilot licence (PPL) is the first step towards your modular training. Holding a PPL licence is a prerequisite to start a Modular ATPL Program.

Also, if all what you want is to fly for fun or sport, this is definitely what you need. The PPL can also be used for people who love aviation but do not want to pursue a career as an airline pilot. It can be used to rent smaller single pilot aircraft as a hobby.

Course Description:

Whether you do it for fun, just to enjoy the pleasure of flight, or because you are starting your training towards a professional career, the Private Pilot Course (PPL) is your first step into the aviation world. At any time, you can transition from your PPL to a Professional career through the CPL Course or Modular ATPL Program, so it is an investment that may pay up for itself in the future.
