EASA ATPL MODULAR COURSE

WHAT IS THE ATPL MODULAR COURSE?

Modular ATPL, also referred to as the 0 to ATPL course, grants its holder the highest level of pilot certification.

The training in this program will allow you to acquire an ATPL through what is commonly called the Modular Pathway. This means that your training progresses through a series of modules. Each module will be a step forward towards your training, but you don't need to commit to all the modules at once. You have more control over the timeline of your training. Applicants for this course have a choice between Residential and Distance Learning Theoretical Training courses. The advantage of the modular pathway is that it can be completed at your own pace.

Gulf Air Academy Modular ATPL Course is (EASA) approved & designed to give you the exact knowledge and expertise to meet the requirements of all the major airlines around the world, once you finish this course, you will be ready to take a right seat in all the major airlines

COURSE BENEFITS

By following a structured single course divided into carefully planned training stages, it's designed to take you from no previous experience in aviation all the way to the ATPL licence in one go.

In the shortest most affordable way possible.

Full Student Support

We have made it one of our priorities to provide our students with every detailed support they will need to settle down and build a future, yet still feel like home.

We will guide you from the first step of enrolment all the way until you obtain your ATPL!

The weather is one of the main factors influencing aviation training, and it rarely creates issues in Greece! Thanks to fantastic weather conditions, we schedule flights 340 days a year. This helps assure that they are on track and are not forced to delay flights due to bad weather.

THEORETICAL TRAINING

The first step is to complete the theoretical training of the **PPL** following subjects. (100 hours total – 90 hours distance learning self-study & 10 hours Ground School training)

- Air Law
- Meteorology
- Navigation
- Communications
- Human Performance and Limitations
- Operational Procedures
- Principles of Flight
- Flight Performance and Planning
- Aircraft General Knowledge

After completing the PPL subjects, you will proceed with the **ATPL** following subjects. (750 hours – 675 hours distance learning self-study & 75 hours Ground School Training)

- Air Law
- General Navigation
- Radio-navigation
- Meteorology
- Human Performance
- VFR Communications
- IFR Communications
- Operational Procedures
- Principles of Flight
- Aircraft Performance
- Flight Planning
- Mass & Balance
- Aircraft General Knowledge (Systems)
- Aircraft General Knowledge (Instrumentation)

COURSE DETAILS

Duration

18 – 20 Months

Total Cost

65,900 € if paid in instalments

62,900 € if paid in advance
